WABCO

WABCO REPLACE AND REPAIR SOLUTIONS FOR RENAULT AND VOLVO CLUTCH COMPRESSORS

Clutch compressors need to be replaced every 700.000 – 1M km. WABCO now offers you a complete range of replace and repair solutions with our newly launched clutch compressor repair kits. Both repair kits are easy to install and are available as an alternative to our complete replacement clutch compressors. This way, both kits offer a cost efficient alternative if complete replacement is not yet necessary. And WABCO clutch compressor technology results in significant energy savings for your customers as well!

SIGNIFICANT ENERGY SAVINGS

WABCO provides market leading clutch compressor technology, making optimal use of an integrated multi-disc clutch and pneumatic clutch actuations. **The clutch disengages the compressor when no air is needed, generating fuel savings of up to 1,000 litres over 150,000 km of long haul operation per year!**

Therefore, WABCO clutch compressor technology is most effective on long haul commercial vehicles with a very low braking frequency, resulting in limited demand for compressed air. Especially for these vehicles, it's crucial that the clutch compressor is functioning appropriately at all times, to reach the highest possible level of efficiency.

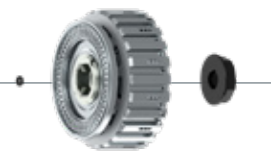

PART NUMBER AND ORDERING

- NEW Clutch Repair Kit**

This kit is used to repair the clutch and consists of a publication, hexagon nut, O-ring and clutch.

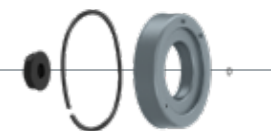

To order this repair kit, use part number **912 512 940 2**.

- NEW Cylinder Head Repair Kit**

This kit is used to repair the cylinder head and consists of a publication, hexagon nut, circlip, O-ring and pressure piece.

To order this repair kit, use part number **912 512 941 2**.

- To order a **completely new WABCO Replacement Clutch compressor**, find the perfect match for your truck in the table below:
